

# OLYMPIC CLEAN-CATCH™

*Now... a faster... easier way  
to collect clean urine specimens*

## **Easy to Use – Saves Time**

The new Olympic Clean-Catch makes urine collection faster and easier with all size dogs – and you get clean specimens. With males, it is easy to position the Clean-Catch to collect clean mid-stream specimens. You can see what you are doing and make sure you get every drop. With females, the narrow, low profile cup slips easily under even small dogs.

## **Dog Friendly**

Clean-Catch saves valuable minutes with every urine collection. Trying to collect urine with a hand-held cup or ladle is slow and inefficient. Some dogs get nervous and won't urinate when you are standing too close to them or will stop urinating when you place a cup under them. But the Clean-Catch is dog friendly. It keeps you at a distance, so the dog is more likely to urinate, and it won't spook the dog when you put it under him or her.

## **No More Bending Down to Collect Samples**

When you use the Clean-Catch, you don't have to bend over or stoop down. Easy on your back. The long handle and flat cup give you visibility, so you get a good specimen every time. More sanitary and makes urine collecting less messy.

## **Clean-Packed Cups. No Cross Contamination.**

When collecting mid-stream urine samples it is extremely important to have a clean container to avoid possible cross contamination between patients (bacterial, cellular, artifactual). The plastic cups furnished with Clean-Catch are clean-packed and for one patient use only. This ensures more reliable lab results and improved patient care. The holder also keeps the cups from touching the ground. The cups have a handy pouring spout and are made of environmentally friendly plastic.

## **Eliminates Washing – Always Ready for Use**

With these inexpensive disposable cups, no time is wasted washing cups or ladles. Each disposable cup costs less than a few seconds of a tech's salary. And since no washing is required, the Clean-Catch collector is always ready for the next patient.

## **Pays for Itself**

The new Olympic Clean-Catch saves you time and money in three ways – you can collect specimens faster, it eliminates washing, and it is always ready for immediate re-use. By cutting costs, it will quickly pay for itself.

**Clean-packed cups prevent cross-contamination.  
Single patient use assures more reliable lab results.  
Eliminates washing – saves time.**

**OLYMPIC CLEAN CATCH™**

Hole for hanging

Non-slip grip

32" long – for large and small dogs

Light-weight aluminum – well balanced

Corrosion resistant coating

- *Easier – no bending – no stooping*
- *Dog friendly – saves time collecting urine*
- *Ideal for males and females*
- *Collect clean mid-stream samples*
- *Always ready for the next patient*
- *Saves time – saves money*

Clean, single use cups protect patients

Just push cup in

Lift cup out

Recyclable plastic  
Enviro-friendly

Narrow oval, less than 1.4" high – ideal for small females and all males

Holds cup securely

Pour spout

Flat bottom sits on table

Cup never touches ground – stays clean

Patent Pending
