

New CARRY-ALL™ transports patients...stores supplies

Transports Patients
Lightweight. Rolls and steers easily in crowded clinics

Carries Supplies
Large shelf for moving and storing supplies

Removable Safety Stretcher
Just lift the stretcher off the cart. A safer and easier way to handle heavy patients and prevent back injuries to techs.

The Olympic Carry-All offers you a lot for the money: You get a patient transport with a removable stretcher and extra space for supplies. It is designed for crowded clinics.

Moves Patients Faster

The Carry-All makes moving patients so quick and easy that it encourages techs to use it instead of trying to hand-carry heavy animals. It weighs only 23 pounds, much less than other gurneys. It turns sharp corners and fits in tight spaces. With the Carry-All, one person can quickly and easily move patients between departments – saving labor and time.

Stores and Carries Supplies

There is also a large shelf for supplies. This gives you extra storage room for supplies without using up floor space. The storage shelf is also useful when you need to transport supplies along with a patient. There is a raised lip around the shelf to prevent supplies from falling off.

Removable Stretcher – for Safety

Like other Olympic Ultra-Lite transports, the Carry-All has a removable stretcher – safer for your patients and your staff. The removable stretcher makes it easier and faster to

transfer animals between the floor and tables and cages. The patients are more comfortable, and they won't be traumatized from being lugged around by hand. And finally, the removable stretcher helps protect your staff from back injuries – the most common and expensive tech injury.

X-ray Transparent Stretcher

The stretcher fabric is radiolucent Herculite® (see facing page). So the stretcher, with the dog safely held on it, can be lifted from the Carry-All to the x-ray table.

Airplane Construction

The Carry-All is lightweight but strong: Aluminum tubing with all structural joints permanently welded. (See Lifetime Warranty facing page.) 4 large hospital swiveling casters with brakes, so it rolls and turns easily. One person can steer it without help. Handles at both ends.

Try it Risk Free

Once they have tried it, your staff will love the Carry-All. This is why we offer it with our money-back guarantee (see facing page). This double-duty patient transport – will save you storage space and time handling patients. And it protects your patients and staff from injury.

Ultra light

Weighs only 23 pounds.
Regular transports weigh
3 to 5 times more.

Smaller

52"L x 22"W x 37"H.
Fits in tight spaces

Airplane construction

Extra strong,
rigid airplane grade
aluminum tubing.

All welded

No clamps to work loose

Outdoor emergency use

Large casters roll smoothly
over rough surfaces.
Removable stretcher
makes extracting patients
from vehicles safer and
more comfortable.

Lifetime warranty

You'll never have to
replace this Olympic
Ultra-Lite. Lifetime
warranty on all parts not
subject to normal wear and
replacement, e.g. casters,
stretcher fabric, etc.

Brakes on all casters

X-ray transparent stretcher

Take x-rays with patient
on stretcher. Saves time.
Suitable for gross evaluations.

Herculite® stretcher fabric

Medical grade plastic wipes clean.
Non-absorbent. Anti-microbial.
Reinforced with carbon fiber.

Stretcher just lifts off

Held securely by 4 posts,
yet easily lifts off cart.

Handles on both ends

Easy steering by
one person

2 Velcro tie-downs

Durable finish

Baked powder coating

Large storage shelf

You can move supplies along with the patient.
And you can use the shelf as extra space for storing
supplies. Shelf is permanently welded to frame
and has a lip on all sides so supplies won't fall off.

Safety Stretcher

The removable soft stretcher is comfortable
for patients. Supports 200 pounds. 2
restraining straps. 4 handholds. Ends of
stretcher are off the floor, so there is finger
room for lifting. Plastic fabric wipes clean –
no more washing. (See Herculite® above.)
