

**NEW**

# OLYMPIC DENTAL TABLE™

**Comfortable standing or seated Better patient presentation Saves time**

**Removable  
drain pan**

**Stainless steel top**

**Adjustable height – electric lift**  **29" – 41"**

**Watch video demonstration**  
[www.OlympicVeterinary.com](http://www.OlympicVeterinary.com)

When table is raised, a tall person can work comfortably. Less tiring. Faster procedures.

Table height adjusts for best access to dental site. Leg room on all sides of table.

**TILT ADJUSTMENT**  
For drainage and better presentation

**DORSAL POSITIONER**  
Folds up to V-positioner

## ***Saves time so you can schedule more dentals***

Today, veterinary dental procedures are performed on make-shift tables not designed for dentistry. These inefficient and uncomfortable tables make dental procedures longer and more tiring. The new Olympic Dental Table solves these problems. It is a completely adjustable table for better patient presentation and operator comfort – and it saves time on every dental procedure.

**Operator comfort** Height of the Olympic table is adjustable from 29" to an extra-tall 41". Patient access without strain.

**Electric Lift** Precise positioning. Capacity 250 pounds.

**Adjustable tilt** For drainage and best presentation. Table tilts to any angle up to 10°. Locks automatically.

**Dorsal positioner** Table sides fold to any angle up to 45° to form a V-positioner. Locks automatically.

**Firm head support** Provides solid support for all dental procedures. No bounce or flex.

**Swing out arms** Standard table has one swing out arm with a stainless instrument tray. Arm can swing to either side of table. Table can also be ordered with a second arm (see Ordering) that has a platform with slots for mounting scaler, etc. You can switch arms from left to right without tools.

**Removable drain pan** Under the head support. Pan slides out easily for cleaning.

**Foot switch swivels** The foot switch swivels so it can always face the operator – easy, fast height adjustment.

**Generous leg room** Comfortable, easy access on all sides of table.

**Tie down cleats** Mounted under sides of table, out of the way. Convenient whether table is in V-position or flat.

**Improved patient presentation** Better presentation saves time. And height, tilt, and dorsal positions can all be quickly adjusted during a case.

**Complete table drainage** A trough under center of table drains the entire table into the removable pan.

**3 electric outlets** Built-in outlets help get electrical cords off the floor.

**Low profile casters-brakes** Table can be moved easily for cleaning floor or to fit your future space requirements.

**Quick clean-up** Top quickly wipes clean between cases.

**Sturdy construction** Designed for dentistry – a strong, stable operative surface. Heavy gauge welded steel. No wobble or sway.

**Dimensions** Top surface: 21" x 50". Overall: 21" x 62". Supports larger dogs in all positions.

**3-year Warranty** *All parts and labor included*, unless damaged by misuse.

**Pay off investment** The Olympic Dental Table saves time and can pay for itself in 6 months by letting you schedule more dentals. Operator comfort and better patient presentation reduce fatigue and speed procedures. Patients benefit by spending less time anesthetized.

### ***Ordering and Information***

**Olympic Dental Table™. Model 50901. Standard model.** Includes one swing arm with instrument tray. Electrical: 120V/60Hz.

**Olympic Dental Table™. Model 50903. Two arm model.** Includes two swing arms. One arm with instrument tray; one arm with holes for mounting scaler, etc. Arms interchangeable left to right without tools. Electrical: 120V/60Hz.
